

Product introduction
 F-127E which is the universal remote control with full-featured and model appearance is a newly developed product of SUOER company, it is used for the air-conditioner. The most obvious trait is that the product's compatibility is reached 99%. If you are still worry for finding an original remote control, this new product will bring you a surprise!

Battery Installation
 Opening the battery cover, according to the mark "+" / "-" inside, then putting two pieces of Size AAA (No.7) alkalines (Portionless), as the following picture:

1. The Remote Controller has a function of stopping memory power. When it changes battery or stops power, if the time isn't more than 48 hours, it needn't reset the code. Or it maybe lost initial reset, you must reset the code.
2. The Remote Controller owns progressively energysaving pattern. The quiescent current approaches zero. It is more electricity saving than before. Under normal condition, the useful life of battery is about 12 months. If you improper operation, the useful life of battery will be shorter.
3. Don't use mixture between new and old battery or different models of batteries.
4. If battery has some spillage, you must put battery out, and then clean the battery's space and replacing new one. If you are going to not use the Remote Controller for a long time, you'd better take them out.

Keystroke Instructions

Problem Solving

When you are using or setting up the controller:

1. Checking your Air-Conditioner is on working state or not.
2. Checking it has batteries or not and the polarity of battery is right or not.
3. Ensure that your Air-conditioner receiver is working in order. If your Air-conditioner is not receiving it properly, it won't be able to function by this remote controller.
4. If this remote controller gets the wrong operation, it maybe stop working. In this case, you take batteries out and repeat to setup after twenty minutes.

child lock function

Lock: keep pressing the "Air conditioning backlight" key until there is a small lock appear on the upper right corner of the screen.

Unlock: keep press "radiating" key until the small lock is disappear.

Tips: after setting the code absolutely right, please lock it to prevent losing the code.

This function is make the remote control lose the setting function, avoiding the code lose by wrong operation, it won't has any effect to the remote's performance.

technical parameter

sheathing material: ABS
 Remote Distance: More than ten meters (According to different model)
 Power Model: DC 3V
 Battery Model: Size AAA(No.7) two pieces of alkalies batteries
 Useful life of battery: About 12 months of under ordinary usage

After sale service

When you are using the Remote Controller that it has any problems, please contact us or agency. We will try our best to offer excellent service. You can't take it apart without permission. If you do like that, we don't assume the responsibility.

Timing use method

This product's timing function is the same as the original remote control.

Step: 1. When pressing the key of "timing on" or "timing off", the timing display bar will flicker.

2. Press the key of "+" or "-" to select the time you want to timing.
3. let the remote control towards to the air-condition and then press the key of "timing on" or "timing off" once.

Cancel timing: let the remote control towards to the air-condition and then press the key of "timing on" or "timing off" once.

Attention: some of the air-condition's "timing off" function are the same with the "sleep" function.
