## Steps of learning

#### Learning for TV remote control

1. First, this learning remote is called Remote B, your remote which will be coupled and learned is called Remote A. In the whole learning process, please put the front of Remote A to Remote B's with space 1 CM.

Original remote referred to Remote A

HL-1340E referred to Remote B

Press and hold "TV" key of remote B, Learning key light is from weak to strong and then long-bright ,release the "TV" key ,and it means that it gets into learning TV status

3. Press the key of remote B which you want to learning ,such as power key, then the Learning key light flash, it gets into learning power status

HL-1340E referred to Remote B

4. Press and hold the power key of remote A for 1 seconds, if the learning key light of remote B is flashing and then long-bright, it means this function is learned successfully.

Original remote referred to Remote A

HL-1340E referred to Remote B

- 5. Repeat step 3 and 4, press the other function of remote B, and then press the opposite function of remote A, learn other functions.
- 6. After finish learning, press "TV" key on Remote B once the learning light goes out, it exits learning state for TV function .then it can be used as TV remote.
- 7. If the learning light comes light again ,please repeat step 3 and 4 ,till the light goes out ,the learning succeed

After finish learning ,remote B can control your TV ,check if all function key is ok for use. If not ,do the learning process once again.

HL-1340E referred to Remote B

The learning methods for DVD remote control is same as learning TV remote control.

Learn DVD should press DVD key once

The learning methods for STB remote control is same as learning TV remote control

Learn STB should press STB key once.

Operation of "one key copy function": ( Only use for our company products which have copy function )

Notice: Convenient for you to understand, we use "A" and "B" to explain.

" A" represents the remote controller HL-1340E which have finished learning.

"B" represents the remote controller HL-1340E which need to learn all the keys from "A" by using "one key copy " function.

"one key copy " function indicator light is learning indicator light.

B the remote needed to do one-key learning

A:Press TV/SAT/DVD and CH+

B:Press TV/SAT/DVD and CH-

- 1. Press any device key (TV, STB, DVD) of "B" and "CH-", Learning indicator will light and turn to flash, it means "B" come into code receiveling mode(if there is no signal within 15s, the light will turn off, and exit receiveing mode.).
- 2. Let the transmitting terminal of "A" aim the transmitting terminal of "B", press any device key (TV, STB, DVD) of "A" and "CH+", Learning indicator will light and turn to flash, it means "A" come into codes sending mode, and the indicator will flash
- 3. When in the copy mode, the indicator light of remote controller "A" and "B" both flash, the indicator light of "B" will flash 3 times when receive codes, it means copy is successful. When all codes of "A" have sent to "B", the indicator will turn off automaticly.
- 4.Now "B" will have all the code of "A", and code will be one-to-one correspondence.

### Operation of remote control

Press the opposite device key as your requirement, then the learing light would light, and then it can control normally.press"TV"Key and learning light flash then it can control your TV.

#### Notice of remote control

HL-1340E remote contoller cannot emit instruction code by itself. Namely, it cannot be used to control any electrical appliances prior to learning. And in the same page, each button can only store one emitted code instruction, Namely, the code instruction for the last learning. In other words, in case a button in the same page of HL-1340E panel has learned different types/formats of emitted code instructions, only the last instruction can be re-emitted and all the previous will be covered by the last.

#### **Problem Solving**

If you have any problems in process, please try the following methods to resolve

- Make sure the batteries are not worn out and that they are inserted correctly.
- 2. Please read the learning process carefully, and operate follow the correct steps
- For valid learning, please use the single original remote control to learn.
