

UNIVERSAL REMOTE

Best position for duplication

(Original remote control on the top of Duplicator)

Auto-scan Type
Multi-frequency 280~870Mhz
Up to 4 different remotes in 1

Duplicating procedures:

-Standard (duplicating)

1. Press and hold button **A** of the **Duplicator**, meanwhile press 4 times the button **B**, then release both buttons, the LED emits a short flash every 2 sec.
2. Place the **Original** remote control on the top of **Duplicator**.
3. Keep pressing the button of the **original** remote control until the LED starts flash quickly.
4. While the LED is flashing, press the button of the **Duplicator** where you want to store the remote's code just copied, until the led will turn off. (Step 1 to 4 video link: <https://youtu.be/mOxFoAC9Etc>)
5. Select and activate the correct procedure in the **SC**, **RCS**, **RCC** procedures to complete the final step (see the compatibility list present in this manual).

SC	means simple code, the duplicator can be used directly after duplicating
RCS	means rolling code simple, You need to insert the new remote into the receiver according to the steps given by the automation manufacturer. (Video link reference: https://youtu.be/OdSzvA1jI00)
RCC	means rolling code complex, 1. First of all you must be closed to the automation. 2. Keep pressing the programmed

button during 10seconds, when the LED start to flash, release the button.
3. Wait until the LED will turn off. The operation has been done, now you can use your new remote control. (Video link reference: https://youtu.be/c1Y2VCKM_mw)

-BFT (duplicating)

1. Press and hold button **A** of the **Duplicator**, meanwhile press 4 times the button **B**, then release both buttons, the LED emits a short flash every 2 sec.
2. Place **Original** remote control on the top of **Duplicator**.
3. Keep pressing the button of the **original** remote control until the LED turn on with a fix light and then emits a double flash every 2 sec.
4. Place **Original** remote control on the top of **Duplicator**.
5. Emit now the SEED CODE of the BFT original remote control, press the 1 and 2 buttons simultaneously until the original remote control LED switches on.
6. Now the **Duplicator** LED will flash quickly, press the button where you want to store the code just copied, until the LED will turn off.
7. Activate now the **RCC** procedure to insert the new remote control on the receiver.

-FAAC / GENIUS (duplicating)

- Attention: verify the programming remote control is a MASTER. Pressing whatever button, the LED has to emit a double flash rather than to switch on as a fixed light.
1. Press and hold button **A** of the **Duplicator**, meanwhile press 4 times the button **B**, then release both buttons, the LED emits a short flash every 2 sec.
 2. Place **Original** remote control on the top of **Duplicator**.
 3. Keep pressing the button of the **original** remote control until the LED turn on with a fix light and then emits a double flash every 2 sec.
 4. Emit now the SEED CODE of the FAAC/GENIUS original remote control, press the 1 and 2 buttons simultaneously until the original remote control LED flashing.
 5. While the FAAC/GENIUS LED is flashing, place it on the top of the **Duplicator** and press the button that you want to copy.
 6. Now the **Duplicator** LED will flash quickly, press the button where you want to store the code just copied, until the LED will turn off.
 7. Activate now the **SC** or **RCC** procedure to insert the new remote control on the receiver.

-V2 (duplicating)

1. Press and hold button **A** of the **Duplicator**, meanwhile

- press 4 times the button **C**, then release both buttons, the LED emits a short flash every 2 sec.
2. Place **Original** remote control on the top of **Duplicator**.
3. Keep pressing the button of the **original** remote control until the LED turn on with a fix light and then emits a double flash every 2 sec.
4. Keep pressing once again the same button of the **original** remote control until the LED starts flash quickly.
5. While the LED is flashing, press the button of the **Duplicator** where you want to store the remote's code just copied, until the led will turn off.
6. Activate now the **RCC** procedure to insert the new remote control on the receiver.
